Mr. John H. Michael  
History Preservation Section  
Calif. Dept. of Parks and Rec.  
P.O. Box 2390, 1416 9th Street  
Sacramento, CA 95811

Dear Mr. Michael,

This is in reference to the Point Pinos Light Station Automation (SCH#74031192). Comments were received through the SCH from the State Park Archaeologist, Mr. RIDDELL. Coordination with Mr. RIDDELL provided more detailed information to the Coast Guard on archaeological values at Pt. Pinos and provided Mr. RIDDELL with further information on the project. During this process this office discovered an error in the Notice of Intent. The original notice reads remove excess machinery and buildings. A new Notice of Intent is being processed which states that the specific machinery is one diesel generator set (of no historic value - still in production) and the buildings will remain.

Mr. RIDDELL mentioned that your office wished to further review this project. Plans for this project are enclosed. Your comments will be appreciated.

Sincerely,

  
G. H. DICKMAN

Commander, U. S. Coast Guard  
Chief, Marine Environmental Protection Branch  
By direction of the District Commander
